

# MCP Attendance policy

RSM-MetroWest Math Competition preparation program (MCP) is a unique offering for students interested in developing their math competition skills and exploring more challenging math topics. This supplementary offering is **free** for RSM-MetroWest students registered in a regular math class. Students qualify for this program via the MCP selection test.

MCP program is designed to follow a strict curriculum, and **strict attendance policy is necessary to maintain the program standards and quality.** If a student cannot maintain the MCP attendance schedule, he/she is un-enrolled from the program once 3 classes are missed.
